Many types of food service outlets embrace delivery as a means of enhancing guest experience. With this in mind, DayMark Safety Systems offers the TamperSeal labeling system: a line of tamper-evident labels for use in the food delivery service industry. Using the labels in conjunction with the MenuPilot® app allows for date code information, safe food handling tips, a company logo and other types of customized information to be printed on the label.

THE DIFFERENCE IS NIGHT AND DAY.™

SEALED FOR SAFETY

Extreme
Tamper-Evident Adhesive
Won't peel off!
Tamper-resistant is not enough.
Ensure your deliveries are safe!

TamperSeal labels adhere to most any packaging material safely and securely. Each label has security slits that cause the label to lose their integrity if someone attempts to open the container. If the seal is broken upon delivery, it is a clear indication that the food may have been tampered with.

Direct Thermal Labels

	Description	QTY	Item #
A	2.2" x 4"	500 labels/roll	**IT118675**
