

Dormont Manufacturing Company provides the highest quality products to the foodservice industry including, the Dormont SWIRL™ Hose. This durable retractable hose connects water-fed appliances and equipment to water supply lines. The unique design makes equipment installation quick and easy and provides many advantages over traditional copper tubing water supply lines.

Applications

- Ice machines
- Coffee makers
- Beverage dispensing equipment
- Steamers
- Combi-ovens
- Drain lines

Product Specifications

Tubing Material: Polyurethane

Quick Disconnect Material: Brass

Maximum Operating Pressure:
100 psig

Maximum Operating Temperature: 160°F

Elbow Material: Brass

Certifications: NSF Certified-Criteria C-2 Special Equipment

Features and Benefits

Ease of Installation

- Flexible construction provides for trouble-free installations, and will not kink like copper
- Optional quick-disconnect features a two-way shut-off valve making it easy and fast to disconnect and clean behind equipment.
- Retractable polyurethane construction allows equipment to be easily moved without disconnecting the water supply.

Durable

- Rugged materials will not kink or crack.
- Polyurethane construction is corrosion resistant.
- Smooth surface is easy to clean.
- NSF certified.

Safe

- Flexible design reduces stress on water supply line when moving equipment.

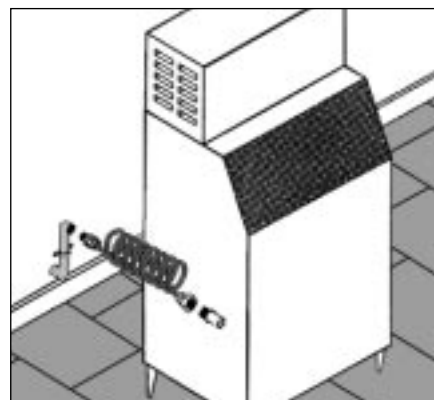

Swirl Hoses – Water Supply Line
