QUAT+ CLEANER-DISINFECTANT-DEODORIZER-BACTERICIDE-FUNGICIDE

QUAT+ is a cleaner, disinfectant and sanitizer designed for institutional use such as Hospitals, Nursing Homes and Institutions where housekeeping will be of prime importance in controlling the hazard of cross infection. QUAT+ is very effective for controlling odours caused by the growth of bacteria, mold, mildew and fungi. It is recommended for use on hard non-porous surfaces, such as floors, walls, sink tops, garbage pails, telephones, rest rooms, bed pans and operating rooms. Pre-clean heavily soiled areas.

This product is not to be used as a sterilant/high-level disinfectant on any surface or instrument that: (1) is introduced directly into the human body, either into or in contact with the bloodstream or normally sterile areas of the body, or (2) contacts intact mucous membranes but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to pre-clean or decontaminate normally sterile areas of the body. This product may be used to pre-clean or decontaminate critical or semicritical medical devices prior to sterilization or high-level disinfection.

DISINFECTION: Use 1 part per 49 parts water (900 ppm active). Apply with a cloth or mop. Allow surface to remain wet for 10 minutes, then remove excess liquid. Prepare a fresh solution for each use. Rinse and allow to dry.

SANITATION: If used for sanitation of food equipment or food contact items, limit the level of active sanitizer to 200 ppm (1 part per 220 parts water). Completely drain the product from all food contact surfaces and rinse with potable water. Avoid contamination of food.

GUARANTEE: didecyl dimethyl ammonium chloride – 4.5% w/w
